Charts

Area
Area charts are like line charts, but the areas below the lines are filled with colors or patterns. Stacked charts are useful for comparing proportional contributions within a category. They plot the relative value that each data series contributes to the total.

Reporting Enhancements

- Auto sizing and object placement
 - Less need to use multiple tables
 - Drag edges of lists, crosstabs, singletons to grow or shrink
- Cleaner UI
 - No more buttons for pages, queries, tools, etc.
 - Breadcrumb style toolbar on the top to jump to page, query, etc.
- Copy/paste
 - Smarts to bring needed queries with reporting object
 - Visualization will bring queries (even joins and unions) along
 - Better browser support (Chrome, Firefox)

DATA MODULES

Data Modules - New Features

- Data prep/clean
- Quick attribute creation
 - Build year, month, quarter
- Dependencies
- Tables
 - Unions, joins, intersections

Choose one of the following options to create your table

Create a copy of a table

Creates a copy of the selected table. You can remove some columns from the table.

Create a view of a table

Creates a table that references columns from one or more tables.

Create a joined view

Select a second table and select the columns to match.

Create a union of tables

To create a union, select additional tables. The tables must have the same number of columns with compatible data types.

Create an intersect of tables

To create an intersect, select a second table. The tables must have the same number of columns with compatible data types.

Create an except of tables

To create an except, select a second table. The tables must have the same number of columns with compatible data types.
