#### Michael Weinhauer

Practice Area Director/ Solutions Architect Senturus, Inc.

#### **POWER BI DESKTOP**

#### Introduction: Power BI Desktop

- Ideal design environment for Power BI
  - Data models
  - Prototyping / proof-of-concept
- Specifically designed for data analytics

I'm an analyst who has data in flat files upon which I want to perform some analysis - and I don't want to get IT involved in what is an exploration effort.

# Power BI Desktop Walkthrough

- Two data files (Excel spreadsheet and a CSV file)
- Make data connections to my files
- Import data
- Inspect relationships
- Build a few visualizations
- Learn about Power BI Desktop features
- Publish Power BI model to Power BI Service
- Discuss how to download the free Power BI Desktop

#### Let's Take a Look ....

#### Demo / Walkthrough

# As a Design / Development Environment

Main design steps

- Connect to data
- Transform data
- Refine data model
- Create relationships
- Create visualizations

Visualizations and fields panes

# **Making Data Connections**

Three options

- Import data
- Direct query
  - Native query direct to data source
  - No data imported / cached
- Live connection (SSAS only)
  - Power BI connects directly to SSAS, generates DAX
  - Power BI becomes presentation layer for SSAS

# **Options for Creating Data Models**

Two options for creating self-serve data models

- Excel PowerPivot
  - Can deploy to Power BI Service or SharePoint
  - Microsoft Office will lag Power BI Desktop
- Power BI Desktop
  - Combines all Excel Power BI
  - Standalone, free tool
  - Monthly updates with significant advances
  - Can publish only to Power BI Service, Power BI Premium Server and SharePoint 2019

# How to Install Power BI Desktop

#### Free download

- <u>https://powerbi.microsoft.com/en-us/desktop/</u>
- Downloads menu in Power BI Service

#### **POWER BI SERVICE**

# Introduction: Power BI Service

Azure-based, business analytics service used for PowerBI.com features, including

- Connections to online services / sources
- Publishing / refreshing data models
- Viewing dashboards and reports online
- Using Q & A (natural language search)
- Sharing / collaborating
- Analyze with Excel

# Power BI Service Walkthrough

- Inspect published models and explore features
- Navigate among datasets, reports and dashboards
- Explain how to assemble dashboards
- Q & A
- Discuss how to sign up for the Power BI Service

#### Let's Take a Look ....

#### Demo / Walkthrough

# Signing Up for Power BI Service

#### https://powerbi.microsoft.com/en-us/landing/signin/

- Sign up with a domain e-mail address not "common" e-mail address
- Note organization constraints
- Start with free account will prompt for Pro account upon attempt to use Pro features (60-day free trial)

# Signing In to Power BI Service

# **Understanding Power BI Service**

- Welcome to Power BI page
- Power BI portal
- Power BI components
  - Datasets
  - Reports
  - Dashboards

# **Power BI Portal: Navigation Pane**

- Organizes deployed content
- By default, all content deployed to My Workspace
- Pro subscription can
  - Create other workspaces for collaboration
  - Select which workspace to deploy content

# **Power BI Components**

- Data sources, workbooks and datasets
- Reports
- Dashboards

The elements depend upon each other Datasets  $\rightarrow$  Reports  $\rightarrow$  Dashboards

#### Power BI Components: Data Sources and Datasets

Datasets can have multiple tables / other sources

Two primary types of data sources

- Cloud services (SaaS)
- On-premises data sources
- Data can either be
  - Imported into a Power BI dataset
  - Left in original source accessed directly via a live connection

#### **Power BI Components: Data Sources and Datasets**

# **Power BI Components: Reports**

- Primary way to analyze data in Power BI
- Reading view vs. editing view
- Creating reports
  - From scratch
  - Importing from
    - Excel (Power view only not pivot tables)
    - Power BI Desktop
  - Apps / organizational content packs reports automatically distributed / access controlled

# Power BI Components: Reports (continued)

- One dataset per report, currently
- Approaches to multi-source reporting
  - Dashboard
  - Self-serve model
  - Connect to organizational model in SSAS Tabular
    - Simply connect to model
    - Nothing to build or import with dynamic connection

# Power BI Components: Dashboards

A summarized view of metrics with drill through to underlying detailed reports

Creating dashboards

- From existing reports ("pinning")
- Using Q & A to create / pin report

Distributing dashboards

- Via mail
- Via app workspaces

# Power BI Components: Dashboards (continued)

Drilling into dashboard tiles

- If created by pinning a visualization, navigates user to corresponding report
- If created by Q & A, navigates user to page containing natural question with its visualization

# Signing Up for Power BI Service

#### https://powerbi.microsoft.com/en-us/landing/signin/

- Sign up with a domain e-mail address not "common" email address
- Note organization constraints
- Start with free account will prompt for Pro account upon attempt to use Pro features (60-day free trial)
