Topics

- Analytics Connector
- Cross Vendor Comparisons
- Dashboards Reporting & Visualizations
- Data & Cloud Architecture
- Data Prep & Modeling
- Deployments & Performance Optimization
- IBM Analytics & Cognos
- Microsoft Azure & Power BI
- Security, governance & administration
- Snowflake
- Tableau

Webinar
6 Ways to Publish & Share Tableau Dashboards
How-to demo and discussion of pros, cons and considerations

Webinar
How to Successfully Implement Self-Service Analytics
Agile, governed self-service BI with a focus on Cognos analytics

Webinar
Creating a Power BI Report Your Boss Can Navigate
How to design a user-friendly nav experience

Webinar
Power BI Report Builder & Paginated Reports
Creating pixel-perfect reports for printing and PDF

Webinar
Using Python with Power BI
Learn the basics, including the software and plotting libraries

Webinar
Streamline Cognos Migrations and Consolidations
Automatically decode Cognos content and reduce migration time by 90%

Agenda

- Introductions
- Recent Cognos releases
- IBM Analytics Content Hub
- What's new in Cognos 11.2.3
- Additional resources and Senturus overview
- Q&A

Inside 11.2.3

- Collaborate in MS Teams
- Data access & modeling improvements
- AI enhancements
- Other on-going improvements
- Data science updates
- Dashboard enhancements
- Reporting enhancements
- Deprecation Notice

Introductions

Tim Aston

Cognos Analytics Senior Product Manager
IBM

Todd Schuman

Practice Lead Installations, Upgrades and Optimization
Senturus, Inc.

Poll #1

What version of Cognos are you using?

- Before Cognos 10
- Cognos 10
- Cognos 11.0.x
- Cognos 11.1.x
- Cognos 11.2.x

Poll #2

What are your biggest challenges with Cognos? (Select all that apply)

- Enabling/adoption of self service
- Performance/report sprawl/general clean up
- Data migrations to the cloud
- Running hybrid environments
- Licensing right-sizing/licensing matching current use

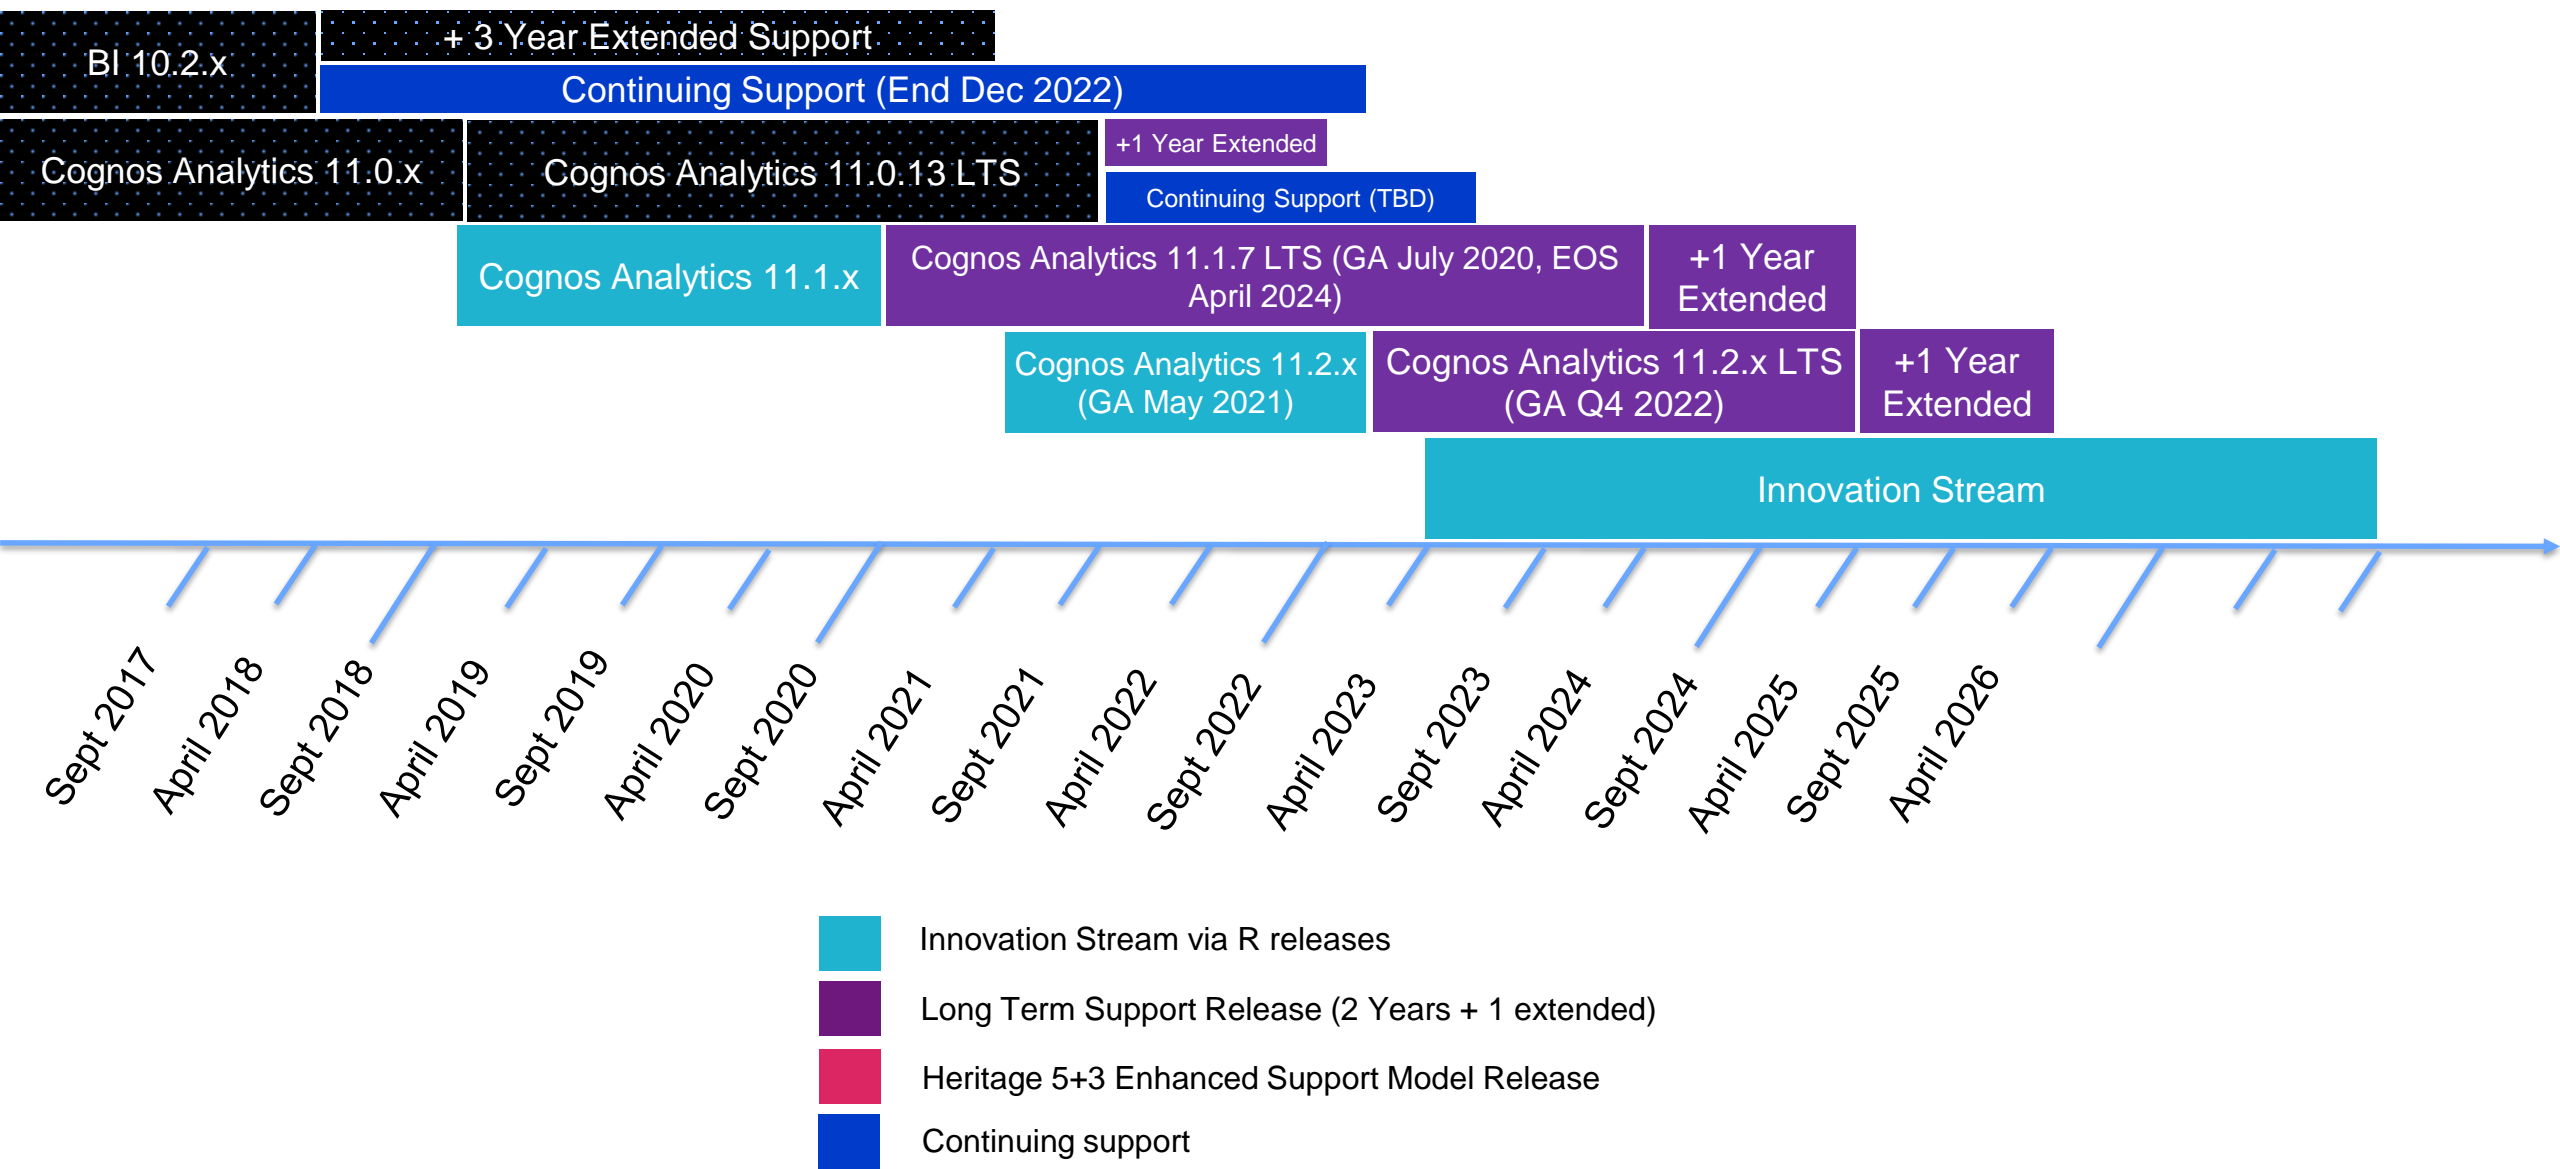

IBM Cognos Analytics with Watson

What's new in 11.2.3

—
The Cognos Analytics
Product Management
Team

Release Life-Cycle (In-market view)

Recent Releases

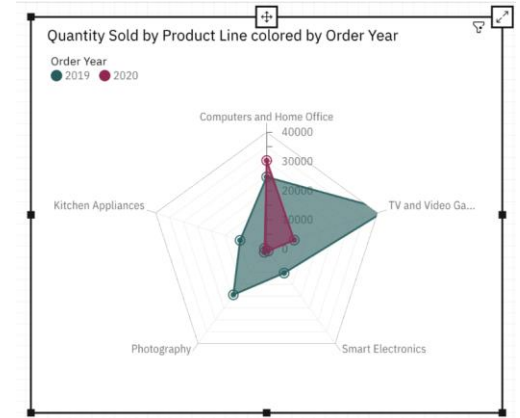

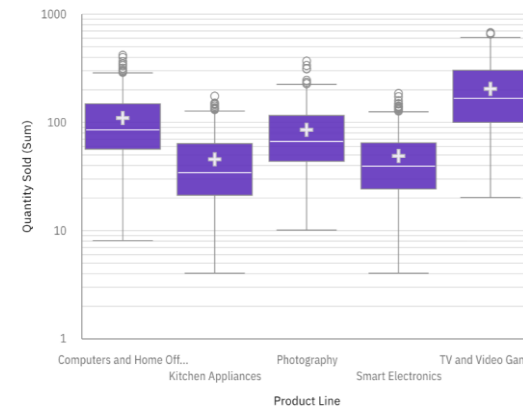

11.2.0 Re-cap

- UX Revamp
- AI Assistant and Forecasting support for OLAP cubes
- New dashboard visualizations: **Boxplot** and **Radar**
- More homepage customization options
- Improved Watson Studio integration
- Introducing Watson Moments
- S3 for TLS certificates
- Faster loading of dashboards

Watson insights

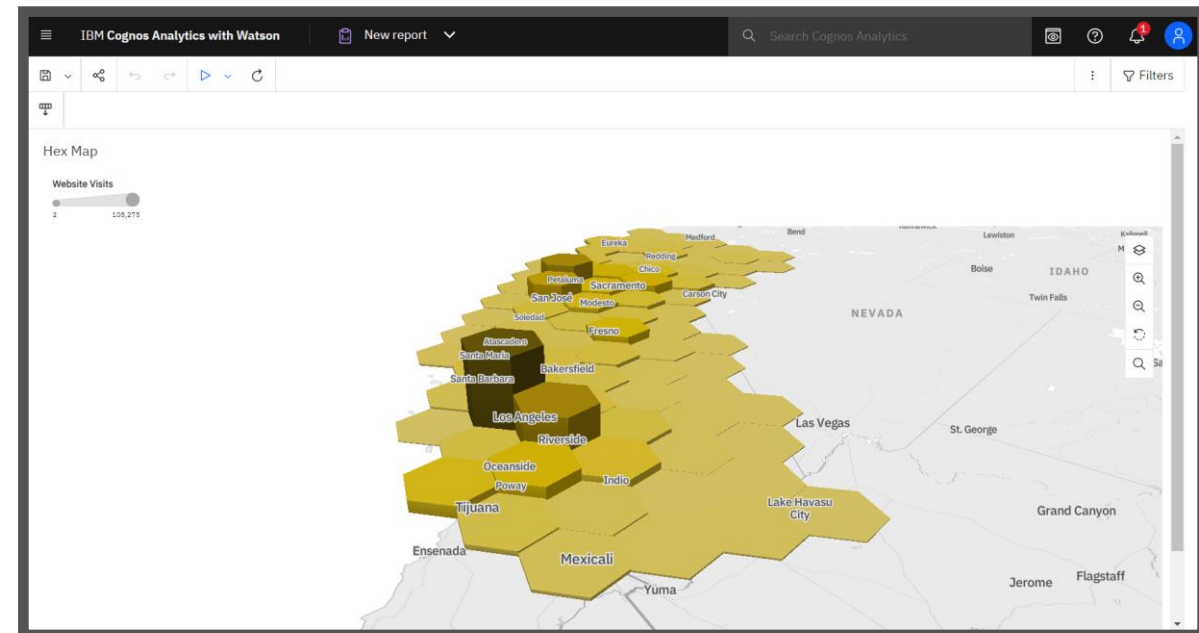

Watson can detect semantic and data driven relationships based on the data that you are investigating. You can use this extra data to help gain perspective and insight into the data that you're exploring.

The screenshot shows the IBM Cognos Analytics homepage. At the top, there is a search bar and navigation icons. The main heading reads 'Hello. Welcome to Cognos Analytics.' Below this, a subheading states: 'Cognos Analytics empowers users with AI-driven self-service analytics. See how automated data preparation, data discovery and visualizations can drive more confident decisions.' Two buttons are visible: 'Watch video' and 'Take a product tour'. The background features a dark blue theme with a central graphic of interconnected cubes and data visualizations.

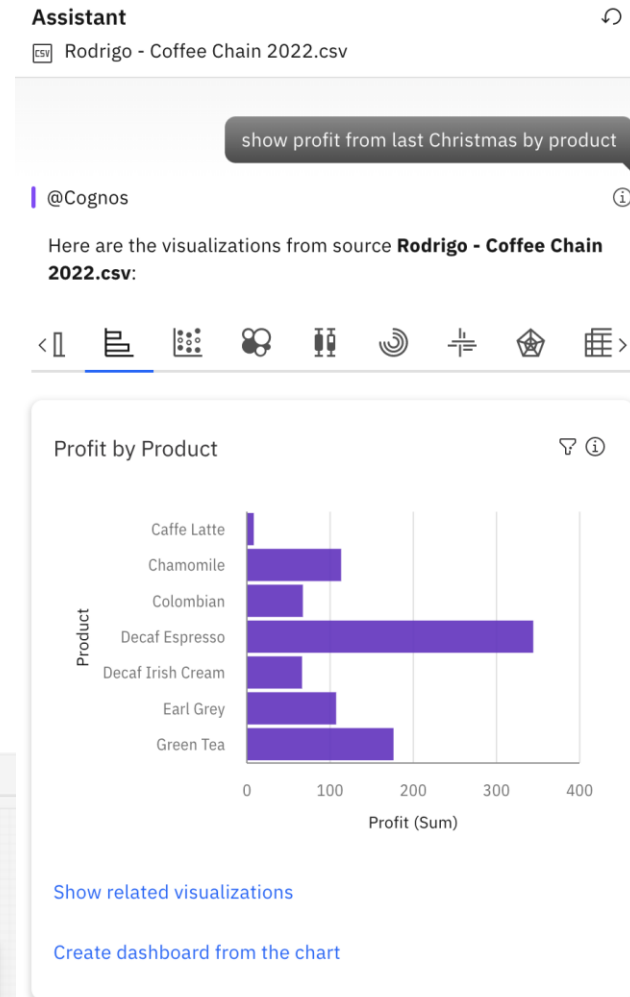

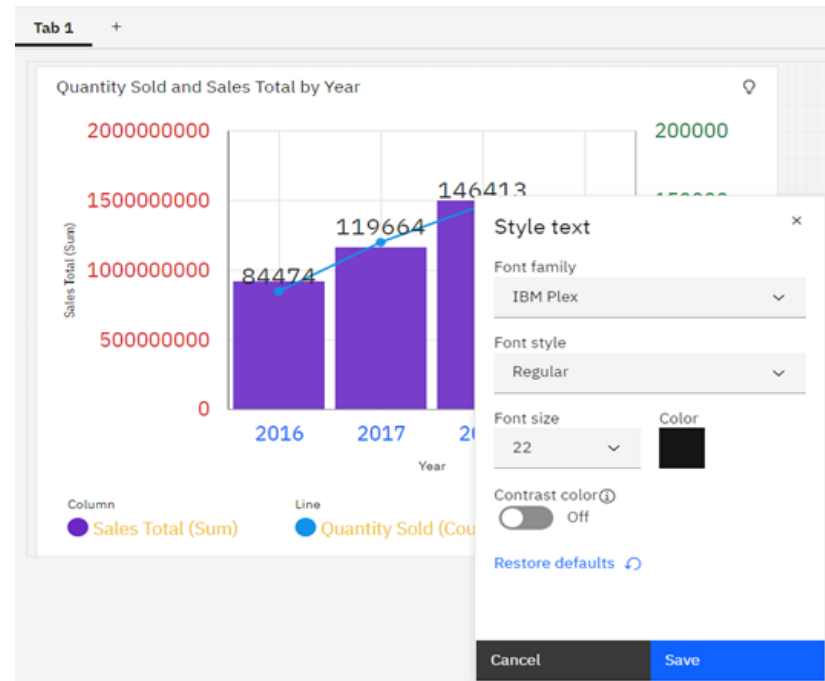

11.2.1 Re-cap

- IBM Cognos Analytics with Watson
- On-demand cloud reduced to 2 lower-cost tiers
- New Mobile only license for \$5
- 3D maps and hex bin grouping
- Dremio and IBM Cloud SQL Query as supported data sources
- Tabbed report performance improvements
- New donut visualization

11.2.2 Re-cap

- NLG re-phraser – better natural language generation
- AI assistant understand relative time and operators
- Dashboard usability improvements
- Sorting in metadata tree in data modules
- Consistent download experience in reporting
- Log4j upgrade
- Expanded vendor support for JWT

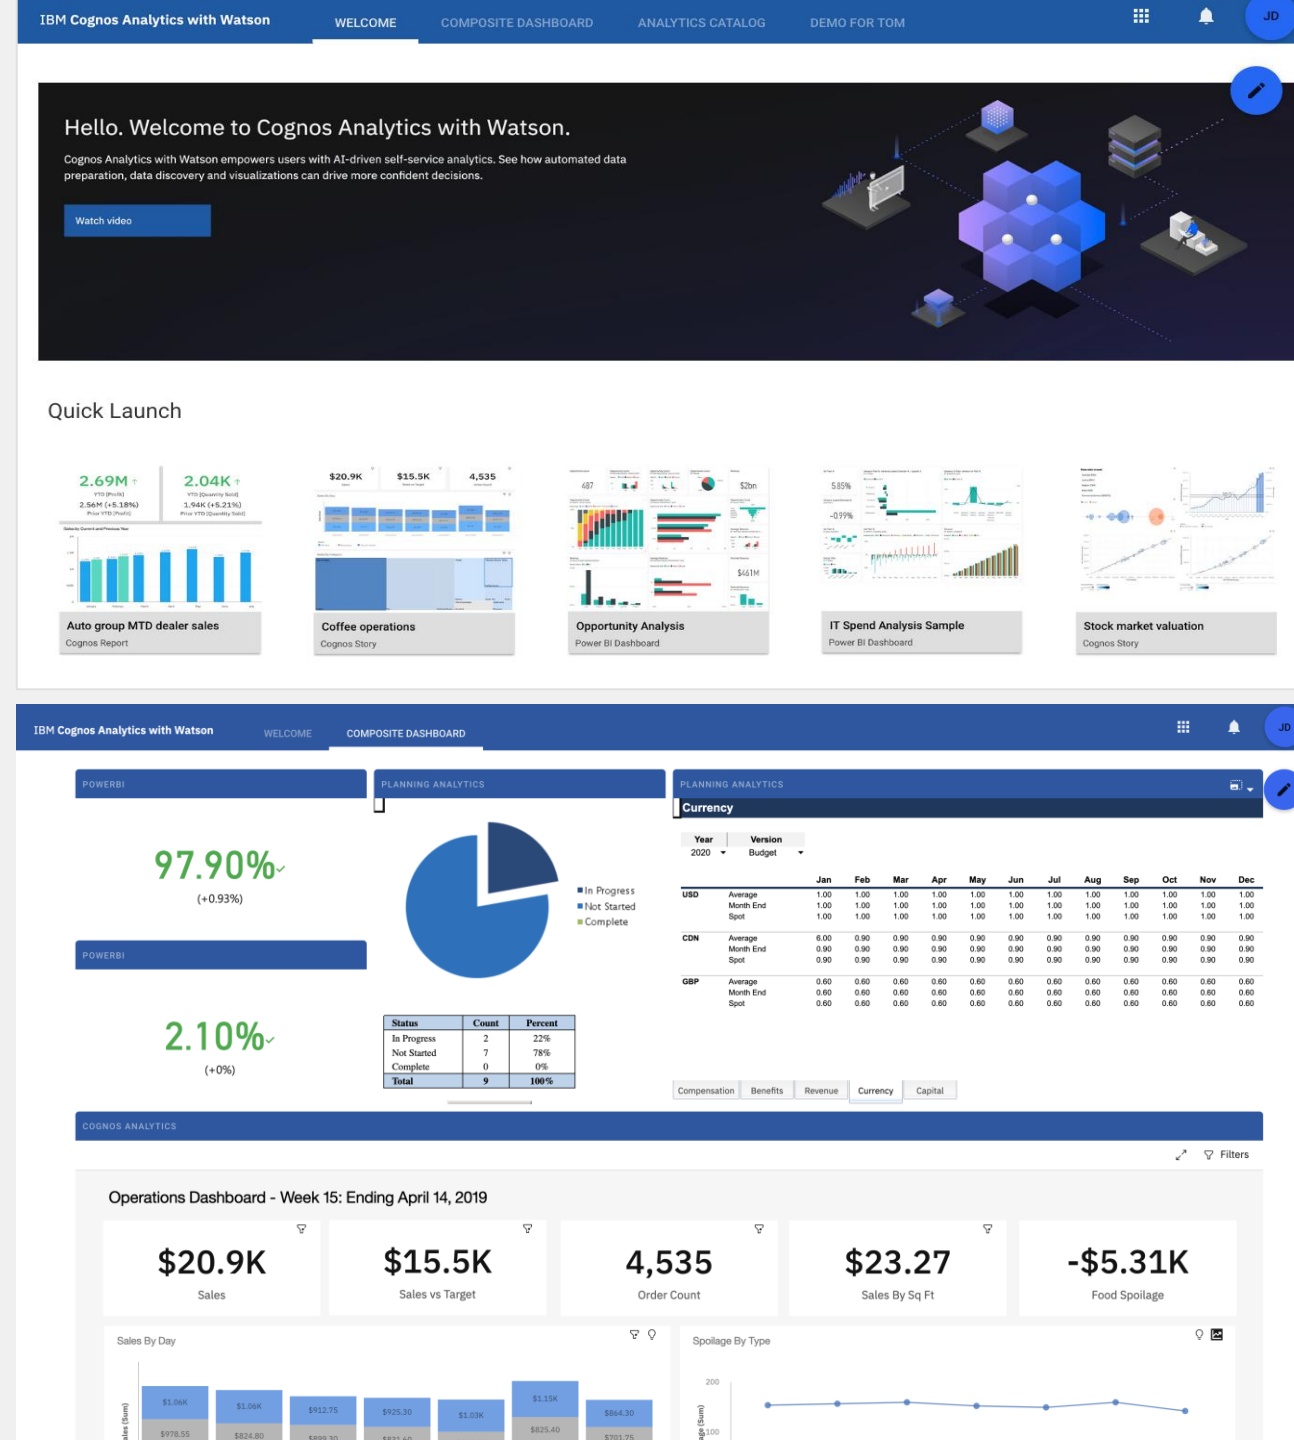

IBM Analytics Content Hub

IBM Analytics Content Hub

Break down analytic silos and deliver ALL business analytics to the communities.

- One stop shop for all enterprise analytics
- Create ‘composite dashboards’ to bring content together
- Better way to deploy analytics

- A single hub to discover, access, search, personalize and recommend business analytics content regardless of vendor
- Your streaming service for analytics content

What's New in 11.2.3

All Features

- Multi-directional Cascading filters in Dashboards
- Increase AI Assistant comprehension by understanding festival names, typos, holidays abbreviations and time expressions like YTD, QTD, MTD and WTD.
- Enhanced forecast accuracy and allow forecast to consider multiple parameters and seasons
- View dashboards in MS Teams workspace tabs to increase collaboration efficiency
- Users can directly share report/dashboard links with their contacts in MS Teams
- Extend package capabilities to Dashboard
- Bring in the Extensions: Values as Values in a Crosstab ; Filter Dropdown ; Data Tool Tip
- New full-page user experience for editing asset properties.
- Create alias and shortcut tables in data modules.
- Allow users run reports with custom SQL without the ability to create and edit them.
- Enhanced search that will return both global search results as well as results from the current folder.
- Jupyter Notebooks R kernel to version 4.1
- Jupyter Notebooks Python kernel upgraded to 3.9.7
- Preview of Parameters and Prompts in Data Modules
- Customize the home page to hide the 'Watch Video' button.
- Capture source reports for report views in Audit DB
- Enhanced Security for Data Source Connections (JWT)
- Enable Zoom bar within a certain visualizations to improve usability
- Modellers can add descriptions to modelling objects
- Report authors can view column descriptions added by modellers
- Allow users to export Jupyter Notebooks in the form of an .ipynb file.
- New data source connections with CAoC On Demand
- Run on-premise Notebooks with Podman as well as Docker. Increased flexibility.
- Datasource Conformance 11.2.3
- Improve performance by reducing local processing costs; increase general performance of DQM engine

Collaborate in
MS Teams

Share report/dashboard links to Microsoft Teams

- Integrate with Microsoft Teams contact list

EXPLORATIONS			
Sample Name	Key Features	Description	Sample Category
Auto group revenue trends	Explorations	This sample exploration provides insights into profit, recalls, and sentiment for a fictional automobile dealership group.	Industry (Automotive)
Coffee exploration	Explorations	This sample exploration demonstrates the use of Explore for a fictional coffee chain.	Industry (Retail)
Employee billings exploration	Explorations	This sample demonstrates the exploration capabilities in the context of a fictional digital marketing company.	Industry (Professional services)
Nebraska school board final grade analysis	Explorations	This sample dashboard displays information about educational outcomes, technology supplies, and enrollment within a fictional school board.	Industry (Education)
NLA 2018 promotion	Explorations	This sample exploration provides insights into loyalty card activities for a small fictional airline.	Industry (Travel and transportation)
Telco churn relationships	Explorations	This sample exploration tracks a fictional telco company's customer churn based on a variety of factors. The Churn Label column indicates whether or not the customer left within the last month. Other columns include location, monthly charges, services, and customer lifetime value.	Industry (Telecommunications)

Embed Cognos dashboards in Microsoft Teams workspace tabs to increase collaboration efficiency

- Add your dashboards to the Teams workspace through the new Cognos Analytics App

- Use the same Cognos credentials to retrieve your Cognos assets

- Start collaborating with your Teams on the Cognos

Upgraded kernels

R kernel to updates version 4.1

Python kernel upgraded to 3.9.7

With upgraded kernels, there is an increased compatibility with newer packages, which would lead to fewer errors when executing notebooks

Run on-premise Notebooks with Podman as well as Docker

This provides flexibility and an alternative for customers leaving Docker due to licensing issues.

```
[root@gentians1 unix]#
